

## Now Your DVD-RAM files can go ANYWHERE with HEURIS' DVD ConnexIT!

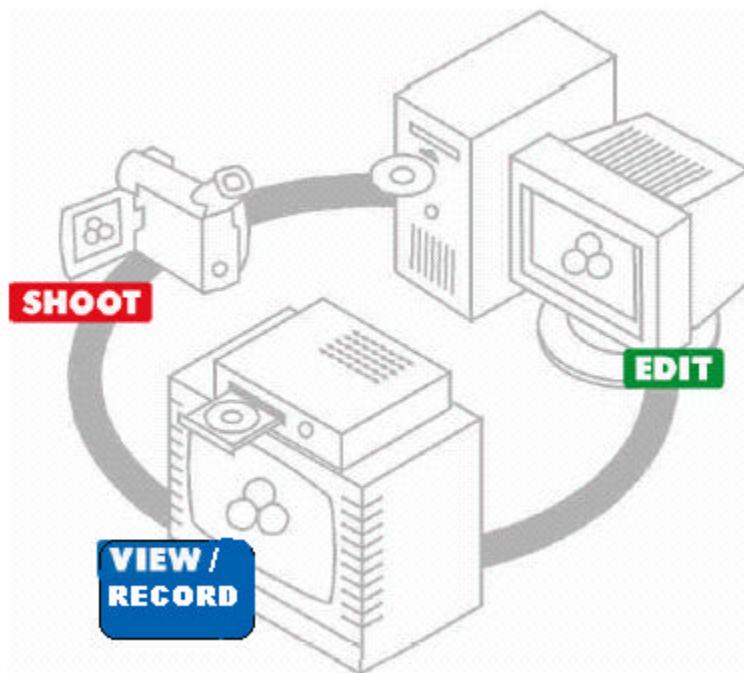

Wouldn't it be great if you could edit those files from your Panasonic DVD player / recorder or camera? Imagine popping that DVD out of the camera and into the multi drive on your computer. Now imagine editing that video in Adobe Premiere and writing a finished movie back to a DVD disc.

Sure it sounds like science fiction. But now it's a reality with HEURIS' powerful new software—DVD ConnexIT.

Think of HEURIS' DVD ConnexIT software as the glue that holds the DVD-VR video process together. From shooting, to editing to watching, HEURIS' DVD ConnexIT brings you there instantly and automatically.

### *Shoot, record, and edit in Adobe Premiere with DVD ConnexIT!*

HEURIS' DVD ConnexIT is a powerful new plug-in that allows you to instantly read VR formatted video files from a DVD-RAM disc in Adobe Premiere®. Now you can edit, add titling, transitions and other special effects and finally export to your favorite viewing format all with a simple click of the mouse! Why wait? HEURIS' DVD ConnexIT is shipping RIGHT NOW!
